Abstract (en)  
[origin: EP1976064A2] The terminal board clamping system (1) has a bus bar system. The flat bus bars are provided for connecting the circuit points (6) on the opposite ends within a level. The angle pieces are coupled with the flat bus bars or another angle pieces, such that the terminal board clamping system are configured with different potential distribution by different assembly of an insulation material housing (3). An independent claim is also included for the terminal board clamp of a terminal board clamping system.
