Abstract (en)

V-grooves (181, 182) are formed in the outer peripheries of sealing portions (151, 152) sealed by reducing the pressure in a heater lamp (11), and the heater lamp can be supported at the V-grooves by clamps that can perform both positioning and installation functions. The heater lamp (11) can be reliably installed by a simple structure that supports only the sealing portions (151, 152).
