Abstract (en)
[origin: US2007157856A1] The invention is directed to a foldable table arrangement comprising a foldable table top having a rear side and a substantially flat front side. The table top is supported by at least one base member and at least one foldable table top support member. The foldable table top support member is pivotally secured to the base member and the table top for pivoting the table top relative to the base member, so as to keep the front side of the table top continuously visible in at least one viewing direction during the pivotal movement. The front side of the pivotable table top is provided with at least one durable work surface, which work surface is provided with at least one durable and substantially transparent surface layer. There is at least one display unit visibly arranged behind said durable and substantially transparent surface layer for presenting moving images.
