Abstract (en)

[origin: WO2007085602A1] The invention relates to tubular elements, especially for clothes rails, comprising at least one lighting means (4) that can be mounted on or in the tubular element (2) and that is retained at a distance from the tubular element (2) on a strip (10) comprising at least one electric conductor. Said strip (10) has several sections that are coupled to each other via plug-in connectors (17, 18), thereby allowing the lighting device to be individually adapted to the desired length of the tubular element (2).
