Abstract (en)

[origin: FR2896497A1] Pyrotechnic gas generator composition comprises a stabilized ammonium nitrate as oxidizing charge and a reducing charge comprising a first reducing element such as guanidine nitrate and/or guanyl urea dinitramide and a second reducing element such as tetrazole, tetrazole derivatives and salts, bitetrazole salts and their derivatives and/or 5,5-azobitetrazole salts. An independent claim is included for pyrotechnic compounds susceptible to be obtained from the pyrotechnic composition.
