Abstract (en)  
[origin: WO2007083023A1] The invention relates to a biodegradable product for environmental biotreatment, comprising at least one fibrous organic substrate, a culture of microorganisms containing bacteria, mushrooms or fungi and/or yeasts which are aerobic, a feeder medium made up of at least one amino acid and polysaccharides and mineral salts. The invention also relates to the process for producing the product and to its uses in the biotreatment of polluted soils, water and air, and in composting.
