Abstract (en)

[origin: FR2896530A1] The device has a plate (2) at each end of a drum shaft (1) on which a roller blind (B) is rolled. An assembly unit (A1) is provided on each of the plates for cooperating with a complementary assembly unit (A2) provided on a lug (6), where the lug is engaged in the top of a vertical slideway (5) to support the shaft (1) via the plates. The assembly units allow depthwise adjustment of a position of the shaft with respect to the slideway.
