Abstract (en)

[origin: WO2007085211A1] The invention relates to a communication system for controlling a data transfer between a goods-related unit arranged in a sales area and an electronic computation unit, with the goods-related unit (1, 1') being connected to the central computation unit (2, 2', 2'') and/or to at least one further goods-related unit (1, 1') via a bus system (3).
