Abstract (en)  
[origin: WO2007084369A2] Certain aspects of a method and system for light-weight simple object access protocol (SOAP) transport for web services based management are disclosed. Aspects of a method may include managing a system using a simple object access protocol (SOAP) message that is mapped over one or both of: a remote management and control protocol (RMCP) and a RMCP security extensions protocol (RSP) to enable remote management of systems using Web services in out-of-band (OOB) management devices.
