Abstract (en)

[origin: WO2007086698A1] Disclosed are a method of providing more digital broadcasting services in a restricted frequency band and a reception system thereof. The reception system includes a tuner which receives a service component and identification information for identifying an alternative coding method of the service component; an extraction unit which parses the received identification information and extracts the alternative coding method of the service component; a controller which controls a decoder corresponding to the extracted alternative coding method to decode the received service component; and the decoder which decodes the received service component under the control of the controller.
