Abstract (en)  
This invention comprises a torso (2) for putting on a shirt (1) thereon and press irons (3) to depress the front part and rear part of the torso (2) to press finish the shirt (1). The torso (2) is formed by plates (2a), (2b) oppositely arranged at the front part and rear part. The present invention is made such that the steam flowing pipe (4) for use in heating the front side plate (2a) is arranged at a position corresponding to the front part (1a) of the shirt (1) at the rear side of the front side plate (2a). When the product of the present invention is used, it is possible to finish the front bodice of the shirt having the cloth overlapped portions rapidly and thus it is possible to increase an efficiency of the pressing operation.
