Abstract (en)

[origin: EP1978165A2] The mounting (10), to fasten the inner housing (14) of a water fitting, has a rotating holding ring (20) to hold and guide at least one holding pin (22) at its inner circumference. The pin passes through an opening (24) at the wall (26) at least partially around the mounting socket pipe (16). Part of the pin extends into the opening (18) through the pipe in one position into a recess at the collar (30) at least partially around the inner housing and, in second position, to lie against the collar. The assembly has electrical contacts (48,50) for a micro-switch to switch an immersed pump on and off in the water tank.
