Abstract (en)

[origin: WO2007068757A1] The present invention relates to the use of a combination of group B vitamins, trace element(s), at least one oil comprising essential fatty acids (-3 and/or -6) and an excipient suitable for oral administration, for the manufacture of a food supplement for use in the simultaneous treatment of excess weight and slackening of the skin localized in the same area. The invention also relates to a food supplement consisting of a mixture of group B vitamins, at least one trace element, chosen from the group consisting of zinc, magnesium, copper, selenium, chromium, iron, manganese and mixtures thereof, of at least one oil comprising at least one essential fatty acid (-3 and/or -6) and at least one excipient suitable for oral administration. The invention also relates to the associated cosmetic treatment method.
