Abstract (en)

[origin: WO2007087656A1] Drive mechanism (7) for a furniture part (12) mounted in a movable manner on a piece of furniture (13), having a drive device (7) which is mounted in a displaceable manner in relation to a base (34) and is intended for pushing the movable furniture part (12) out of a closed end position into an open position, wherein the drive device (18) comprises a pushing-out element (19), which can be activated by an energy store (24) and is guided in a preferably heart-shaped guideway (25, 25') formed on the base (34), and a securing element (10) for arresting the movable furniture part (12), in particular a driver element (4) which is, or can be, assigned to the movable furniture part (12), wherein the securing element (10) is connected in a movable manner to the pushing-out element (19) and is guided in a guideway (27) which is formed on the base (34) and is preferably separate from the guideway (25) of the pushing-out element (19).
