Abstract (en)  
[origin: WO2007071316A1] An advertising hoarding with a seat has two parallel vertical pipes (3) which are set in concrete in the ground in the form of stakes (8). The upper free ends of the vertical pipes (3) are connected to a horizontal pipe (1) by means of knee bends (2). The advertising seat panel (4) is movably mounted in the frame which is formed in this way by axle pins (14) and guided in guides with grooves (24) which are fixed to the vertical pipes (3). The advertising seat panel (4) is formed from a U-profile (13) into which the transparent protective panels (17) are drawn. A filling means (15) with an aluminum sheet (16) attached to both sides is arranged between the transparent protective panels (17). An advertisement support with a visual advertisement is inserted between the transparent panel (17) and the filling means (15). A sitting area for temporarily resting on is produced by turning the advertising seat panel (4) in one or the other direction.
