Abstract (en)

[origin: WO2007079155A2] Two-coat compositions and methods are provided for forming cosmetic films on a biological surface which are long-lasting, transfer-resistant, water-proof, oil-proof, non-migrating, comfortable to wear, and which are capable of filling in fine lines and wrinkles. The two-coat compositions generally comprise a hydrophilic base coat composition and a top coat composition, and are useful for formulating cosmetics and personal care products.
