Abstract (en)

[origin: EP1813332A1] The connection medium comprises a strip-shaped element with a thickened portion in an effective distance from a rear edge over an effective part of the overall length. A connecting link is attached at the rear edge, where a detachable connecting mechanism is provided with the component part, such that the strip-shaped link is inserted in a groove (16) of a construction element (1) and is attached on the connecting link by the connecting mechanism of another construction element (2).
