Abstract (en)

[origin: WO2007089621A1] To provide a packaging bag with pour spout which can easily pour out content even if the fluidity is poor and which can reduce residual content. A packaging bag 1 with pour spout wherein the pour spout 10 flow path 1 is established in a top part of the packaging bag 1 is partitioned by sealed regions 5a, 7 made by sealing two sheets of film 2, 3, and a shape retaining member 12 which separates these 2 sheets of film 2, 3 is established in the flow path 11 of the pour spout 10; wherein the shape retaining member 12 ensures that a gap 16a, 16b will form between the sealed regions 5a, 7 which partition both sides of the flow path 11 along the whole length, and the shape retaining member 12 is fixed with regards to only one film 2 of the two sheets of film 2, 3.
