Abstract (en)

[origin: WO2007076584A2] The invention describes an apparatus which enables the automatic pour out of a glass of beer with a choice of several predetermined volumes and a tilt system which adapts fully automatically and continuously the position of the beer glass during the pour out process. The home multiple beers dispensing apparatus is provided with at least two beverage cartridges comprising an air pressure reservoir system and individual cooling means. The cartridges, in fact disposable or non-disposable recipients containing the beer, are preferable in metal and in the form of cylindrical shaped mini kegs.
