Abstract (en)

[origin: WO2007088135A1] The invention relates to a method for the purification of a resorbable polymer from residual monomers comprising the addition of a solution of said polymer in a solvent and the addition of a precipitation agent into a mixing chamber to precipitate the polymer, characterized in that the concentration of the polymer in the solution is $\log C_{\text{crit}} \pm 0.3$ logarithmic units, wherein C_{crit} is the critical concentration.
