Abstract (en)

[origin: WO2007071667A8] The invention relates to a method for impregnating a textile surface, in which the textile surface (1) is brought into contact with at least one fixed hollow cylinder (5) dispensing an impregnating liquid through holes provided on the contact surface between the cylinder and the textile surface, such as to impregnate the textile surface on one of the faces thereof. The inventive method can also be used to impregnate a textile surface in a controlled, precise and productive manner.
