Abstract (en)
[origin: WO2007041781A1] This invention relates to support assembly (10) that may be used to provide support for a person when moving about on an elevated part of a structure, such as an ISO shipping container or an ISO tank. The support assembly (10) includes a transportable guide support (11), on which there is mounted a guide (12), and a support structure (13) that is pivotally connected to a base (14), which itself is capable of movement along the guide. The transportable guide support, in use, may be located on top of the elevated structure.
