Abstract (en)

[origin: WO2007082668A1] An exhaust gas purification device (10) having an outer housing (16), having a feeder (12) which is arranged therein and having an elastic compensating element (14) which surrounds the feeder (12), is characterized in that, at least before the first start of operation, an adhesive layer (22) is provided between the feeder (12) and the compensating element (14) and/or between the compensating element (14) and the outer housing (16). Also described is a method for producing an exhaust gas purification device.
