Abstract (en)
[origin: US2008251517A1] A container for closing an inlet of one or more hoses including a sealant cap, a cylindrical component and a cover, with one or more hoses passing through the cap and sealed by gaskets between the cap and hoses and wherein the hoses pass through a stabilization bar. The cover is removable from the cylindrical component, and the cylindrical component is removable from the cap. A viewing window and inlet aperture are provided in a side of the cylindrical component.
