Abstract (en)  
[origin: EP1981056A2] The system has a housing base (2) and a set of connection devices (5, 6) provided for a conductor. A retaining chamber is provided for a functional module (10a) that is insertable into the retaining chamber. Three functional modules with different functions and/or geometries are inserted into a recess (9), and contact a set of contacts (11, 12). The functional modules are lockable in the recess with a separate hook. The contacts are formed at the functional modules and connected with the connection devices over bus bars (13).
