Abstract (en)
[origin: WO2007090310A1] A stick handle (1) is described, in particular for walking sticks, trekking sticks, alpine ski sticks, cross-country sticks and Nordic walking sticks, with a handle body (14) and with a device (8-11, 15) for the self-latching fastening of a hand-holding device (25), in particular in the form of a hand loop or a glove. For the self-latching fastening, the device (8-11, 15) comprises at least one recess (10) for receiving a coupling element (33), in particular preferably in the form of a clip or a loop, provided on the hand-holding device (25), wherein the device (8-11, 15) has a clamping element (8), and the recess (10) of the device (8-11, 15) is exposed in an insertion position (A) of the clamping element (8) in such a manner that the coupling element (33) of a hand-holding device (25) not connected to the stick handle (1) can be inserted into said recess (10), and wherein the device (8-11, 15) can be brought by tilting or displacement of the clamping element (8) into a locking position (B) in which the recess (10) is closed and the coupling element (33) is trapped in the recess (10).
