Abstract (en)
[origin: DE102006056897A1] Method for transferring image-forming layers of a transfer film (5) of a carrier film to a printed sheet comprises placing a cleaning device (R) on a pressing roller (3) in the region of the transfer film before or after the transfer gap (6) and operating the cleaning device in a mode for cleaning the surface of the pressing roller during rotation of the roller and/or placing the cleaning device on the transfer film in the region of a guide of a film path of the transfer film in a region in the running direction before and/or after the transfer gap and operating the cleaning device in a mode for cleaning the surface, surfaces and/or edge regions of the film path during transport of the transfer film. An independent claim is also included for a device for transferring image-forming layers of a transfer film of a carrier film to a printed sheet. Preferred Features: The cleaning device is connected with the pressing roller and/or with the film path of the transfer film in a mode for cleaning the surface during coating of the printed sheet by applying a film coating of the carrier film in the transfer gap.
