Abstract (en)
[origin: WO2007087990A1] The invention relates to a control element (1), in particular for a motor vehicle, consisting of a material (2) through which light can be passed and which is provided with at least one opaque coating (3) provided with symbols (5), and having a transparent enamel layer (4) on the coating (3), wherein nanoparticles (11) are introduced into the enamel layer (4), and the coating (3) and the enamel layer (4) are removed by means of a laser.
