Abstract (en)
[origin: WO2007034084A1] The invention concerns a container (1) with tamperproof seal comprising an open packaging envelope (2), means for closing (3) said open end, linking means (4) arranged between the closing means (3) and the envelope (2), and a tamperproof (5) seal capable of being mechanically interlocked when the container is closed after being filled. Said container is characterized in that the tamperproof seal consists of cleavable locking means (8), provided with snap-on means (9), positioned in a reserved housing (12), said locking means (8) having an integral rupturing hinge (11), and locking means located in the closing means (3) capable of receiving said snap-on means when the tamperproof seal is cocked.
