Abstract (en)  
[origin: US2009001069A1] A cooking appliance including a high-level cooking appliance having a muffle including a muffle compartment defining a cooking compartment with a muffle opening, a door for movement between an open and closed relationship with the muffle opening and a drive device controlled by a control device for moving the door, the cooking appliance including a detector for determining a trapping condition wherein an object becomes trapped as the door is being moved, wherein the detector is configured for detecting the trapping state by comparing a door movement parameter with a threshold value associated with door movement.
