Abstract (en)
[origin: WO2007090738A1] The invention relates to a guide rail (1), which can be fixed to horizontal bars (3) comprising angled end regions (3a, 3b) on a grid-type side part (2) of an oven, a dishwasher or similar appliances and which has a rapid fixing device, consisting of two retaining elements (4a, 4b) that are fixed in the end region of the guide rail and that can be detachably fixed to a bar (3) on the grid-type side part (2). According to the invention, both the front and the rear retaining element (4a, 4b) have respective first and second clip-type retaining sections (40a, 40b, 41a, 41b), the first partially encompassing the longitudinal extension of a bar (3) and the second partially encompassing the angled end regions (3a, 3b) of said bar (3). The retaining section (41b) of the rear retaining element (4b) is open towards the rear of the guide rail (1), allowing the rail (1) with its rapid fixing device to be pushed and fixed onto one of the bars (3) from the front of the grid-type side part (2).
