Abstract (en)
[origin: WO2007091227A1] The present invention relates to a footway product comprising a base (2) an upper planar surface (7) on the base, a raised rim (9) surrounding the planar surface (7). A flexible graphic sheet (8) is adhered by means of adhesive to the upper planar surface (7) located within the raised rim (9). The upper surface of the graphic sheet (8) has graphic subject-matter printed thereon, and said upper surface of the graphic sheet (8) is slip resistant. The upper planar surface may be located on a raised portion (6) which extends upwardly from the base (2). The base (2) may also have a perimeter area adjacent to the raised portion (6), said perimeter area having a plurality of upwardly extending projections (5) to provide a slip resistant surface on said perimeter area. The tops of the projections (5) and the rim (9) are substantially flat and all lie in substantially the same plane as the top surface of the graphic sheet (8).
