Abstract (en)  
[origin: EP1982614A1] The unit has two partial units (2, 3) with two receptacles (5, 6) that receive a cosmetic substance and a closure cap (7, 8). The partial units are inter-connected by a coupling member (4), where the coupling member comprises a central portion with two axial coupling projections. The coupling projection engages with a cap recess when the projection prevails in an assembled state. A longitudinal hollow space extends in an axial direction along the coupling projection of the coupling member.
