Abstract (en)
[origin: EP1982926A1] The storage and transport containers have separation wall brackets (9). The U-profile flanges of the separation wall brackets at upper ends in the mounting position have vertical flight slots. The separation wall is designed with shoulder bits, which is substituted in the vertical slots. The interior space of the containers is divided by the separation wall, on whose forehead vertical edges are set up, which are U-shaped in cross section, with outer catch cam designed separation wall brackets. The catch cam is plugged in perforations of the container walls facing each other.
