Abstract (en)

[origin: EP1983127A2] The gun has an inflow tube (2) with a longitudinal axle, which is arranged below an angle of 95 degrees to 135 degrees with respect to a longitudinal axle of an exhaust tube (1). A valve mechanism integrated on sides of the exhaust tube ensures a dead space-free and cross-section constant flow cross-section along the inflow and exhaust tubes. The valve mechanism accommodated in the exhaust tube comprises a piston (10) that is metallically sealed and rest by a spring (9).
