Abstract (en)

[origin: EP1983132A2] The unit has a rack (10) comprising a front side (12) and a side wall (14). A lock unit (20) such as door or flap, is arranged in the range of front side of the rack in a closed state. A rotatable bracket is utilized to deviate the lock unit relative to the rack. The bracket is guided such that the lock unit is shifted into the range of side wall during the opening of the front side. The bracket comprises a leverage with two lever arms (30, 40), which are arranged at the rack and the lock unit.
