Abstract (en)
[origin: EP1983619A1] The base has a tubular body (1) exteriorly comprising a threaded lock (5) and fixation plate (6) perpendicular to a longitudinal axis of the body. A central contact (3) is mounted in the body. An insulator (4) is interposed between the contact and a tubular metallic piece (2) that forms an external contact. The metallic piece is tightly fixed in an internal wall of the body while ensuring limited relative longitudinal displacement from 0.05-1mm.
