Abstract (en)

[origin: WO2007094550A1] The present invention relates to a hair curling iron that compresses and heats hair to create various waves or curls in hair wholly or partially and, more particularly, to a hair curling iron having a roller of various shapes, in which a plurality of heat pads may be provided inclined in a lower cover and, at the same time, a rotating roller is attached/detached or fixed to an upper cover, having various shapes such as a circle, quadrangle, hexagon, octagon, etc. so that the hair may come in contact between the heating pads and the rotating roller of various shapes, thus creating various hairstyles more effectively. Accordingly, the hair curling iron having a roller of various shapes of the present invention provides various effects in that it is possible not only for an experienced beauty artist but also for an individual to express a variety of hairstyles with various curls since the shape of the rotating roller is diversified, it provides an effect of facilitating the expression of an hairstyle in accordance with a user's taste, it prevents the hair from being damaged, and it is possible to express an exact hairstyle in accordance with the user's taste even with a weak force, thus satisfying the users' demand.
