Abstract (en)  
[origin: WO2007093736A2] The invention relates to a cover (1) for closing a moulding mould (2) using closure mould technology such as resin infusion or injection. Said cover is characterised in that it comprises a form-maintaining frame provided with a plurality of inflatable wedges (11-16) which are arranged on at least part of the circumference thereof and mounted in a removable manner.
