Abstract (en)
[origin: WO2007083151A1] A package (110) comprising a body defining an external surface; a belt (124) supported for movement within the body; first and second tab members (128, 130) attached to the belt (124) such that when the first tab member (128) is moved in a first direction, the second tab member (130) is driven by the belt (124) to move in a second direction different to the first direction; and a first grip member (150) fixed to the first tab member (128) for movement therewith, the grip member (150) being movable over the external surface of the body to move the first tab member.
