Abstract (en)

[origin: WO2007093165A2] A machine is described for producing a knitted fabric with at least partial use of fibrous material (10), in particular a circular knitting machine (1). At least selected knitting stations (6) are assigned drawing frames (8) for producing threads (11) which are formed from the fibrous materials (10). According to the invention, the drawing frames (8) lie in the reaching area of an operator (5) working on the machine (1) and can be opened downwards (arrow v) or to the side.
