Abstract (en)

[origin: WO2008101491A1] Disclosed is a mounting clamp for joining wooden parts to one another and to the foundation, particularly for joining boards of outdoor balcony and deck covers. According to the invention, a rectangular, preferably square bottom plate (1) is provided, and two vertical webs (2, 3) which are stamped out of the bottom plate in opposite directions in a U-shaped manner and are vertically bent are provided at a short distance next to each other in the center of the bottom plate (1) relative to the width thereof. Each web (2, 3) supports a vertically projecting nail (16, 17) in the center, said nails (16, 17) extending in opposite directions.
