Abstract (en)

[origin: WO2007093265A1] A housing part (2) having a sealing face around the housing part which is to be sealingly fastened, in order to seal off the housing part against another housing part, with at least one fastening opening for passing through fastening elements, by means of a seal (80) on another housing part. Arranged at at least one fastening opening is an annular overhang which projects beyond the sealing face, wherein a minimum spacing between the sealing face of the housing part and a sealing face on the other housing part is defined by the overhang.
