Abstract (en)

[origin: EP1985566A2] The apparatus has four unitary identical modules (1), where each module is equipped with a cord (2) terminated by a mains plug (3) and a radiant, induction or halogen type burner. The cord is retractable inside the module when the cord is not connected on the mains. The modules are utilized individually for heating casserole used by a housekeeper, and are in a group of two for heating large sized containers. The module is presented in the form of closed rectangular or square shaped support case on its upper surface.
