Abstract (en)
[origin: DE202007006213U1] The device comprises a double-sided guide, which has patterns on a projection at its lower surface, in which bores are arranged. The three bores are provided, through which the fixing screws are guided, which is connected with supplementing mounting parts. The guide is fixed directly or indirectly on the folding plate. The guide is made of a suitable rolled section or a cast primary material. An independent claim is also included for guides for switching device.
