Abstract (en)
[origin: EP1985932A2] The indicator has a display (1) with a display region (A) serving as a graphic region with a higher resolution and disconnected in a current saving operating condition. A display region (B) serves as a simple display region with a smaller resolution, and is durably operated in the current saving operating condition. The region (B) is directly connected with a micro controller (2) by conductors (4) and directly controlled by the conductors. The region (A) is controlled by an LCD controller (3), which is disconnected in the current saving operating condition or connected in a standby mode.
