Abstract (en)  
[origin: EP1985934A1] It is an object of the present invention to provide an indoor unit of an air conditioner where the depth of the indoor unit can be made to appear thin. An indoor unit (1) of an air conditioner is disposed with a body (2) and a cover member (9). The body (2) includes a front top surface (53) and a rear step portion (51). The rear step portion (51) is formed so as to be lower than the front top surface (53). The rear step portion (51) is capable of being embedded in a wall. The cover member (9) is disposed adjoining the front top surface (53). The cover member (9) has a width (L2) that is shorter than a length (L1) of the rear step portion (51). The cover member (9) covers part of the rear step portion (51).
