Abstract (en)
[origin: WO2007096898A2] The present invention relates to a package-companion-user interactive system providing a comprehensive means of product authentication, registration for effective compliance, with user real-time feedback. The system comprises of a product package provided with a smart data processor and companion device comprising a housing with package holding provision; an array of signal generating means and signal sensing means provided in the said device to receive and reflect signals generated by the said signal generating means; user interactive means; powered time tracking means; data decoding means, data processing, data storage means, optionally equipped with audio visual display means, data transfer and connectivity means so configured to register user with the said device; authenticate product package, register product package, and optionally carrying out transient data collection and / or user feed back; when the said product package is placed in the said housing; wherein the product package is without any severable conductor.
