Abstract (en)

[origin: WO2007090527A2] The invention relates to oxidation-stable compositions which contain, in addition to at least one oxidation agent, a ginseng extract in a cosmetic support. Said compositions are used to reduce hair damage, skin-ageing and skin irritations induced by the oxidation agent, in addition to improving the elasticity of the skin. The effects of the extracts can be obtained during the oxidative hair treatment in the presence of an oxidation agent.
