Abstract (en)

[origin: WO2007095288A2] Methionine-containing protein or peptide compositions may include at least one methionine-containing protein or peptide and at least one antioxidant that inhibits oxidation of the at least one methionine-containing peptide or protein, wherein the compositions are inhalable. Particles may include a surface enriched with a surface excipient having a glass transition temperature and a core enriched with at least one methionine-containing protein or peptide. Methods of making, methods of treating and unit dosage forms are also included.
